PROFILE

Software developer working across web applications, e-commerce, business automation, and systems integration. Experienced in connecting ERP systems to webshops, managing supplier data flows, and building maintainable software with PHP, Laravel, SQL, and JavaScript.

PROFESSIONAL EXPERIENCE

Webshop Administrator / Developer | 2019 - Present

ZOMKO Kereskedelmi Kft.

Managing and developing complex e-commerce solutions. Handling multiple importer data streams, ERP integrations, and building custom bridge solutions between internal systems and the webshop.

- Developed high-performance ERP-to-Webshop bridge
- Managed thousands of SKU imports across multiple providers
- Optimized database structures for large-scale retail

PHP · Laravel · SQL · JavaScript · ERP Systems

Software Developer | 2017 - 2019

EBOX Informatika Kft.

Developed desktop and web applications for business clients. Worked on service management systems and customer-facing tools.

- Built internal service management software
- Developed client profile pages with custom integrations
- Improved system reliability through automated testing

C# · SQL · JavaScript · .NET

Software Developer | 2015 - 2017

Procontrol Elektronika Kft.

Software design and development for specialized electronics and industrial systems. Focus on reliability and clean code in mission-critical environments.

- Developed software for industrial electronic devices
- Implemented clean code principles in legacy environments
- Collaborated on large-scale access control systems

C# · Delphi · SQL · C++
